ARCHITECTURAL DESIGNER — INTERIOR DESIGNER

PROFILE

Spatial clarity, *from brief to build.*

Architectural Designer and Interior Designer with professional experience at an engineering and contracting firm and project work across residential, commercial, and retail projects in Yemen and Saudi Arabia. My work spans client requirements, space planning, design development, Revit-based 3D modeling, architectural documentation, visualization, and site supervision support. I focus on translating project requirements into functional, visually coherent, and clearly documented design solutions.

PROJECT INDEX

Selected works,
across contexts & scales.

PROJECT	TYPE	LOCATION / YEAR	AREA	STATUS
01	Rahhal Fuel Station FUEL STATION	Al Hudaydah, Yemen 2025	2,435 m ²	Under Construction - Early Stage
02	Bakka Supermarket RETAIL INTERIOR	Makkah, Saudi Arabia 2025	342 m ²	Implemented
03	Residential Villa Facade Design RESIDENTIAL FACADE	Riyadh, Saudi Arabia 2025	—	Implemented
04	OXIVA IBB ACADEMIC - TEAM PROJECT	Wadi Al-Ma'ayn, Ibb, Yemen 2024	19.8 ha	Tamayouz 2025 - Competition Submission

PROJECT OVERVIEW

A controlled roadside system.

A fuel station developed around a controlled one-entry/one-exit circulation scheme, integrating fueling operations, retail, vehicle-service facilities, and a private residential component within a coordinated site layout.

SITE AREA 2,435 m ²	PROJECT TYPE Fuel Station
LOCATION Al Hudaydah, Yemen	YEAR 2025
STATUS Under Construction · Early Stage

RAHHAL FUEL STATION · ARCHITECTURAL VISUALIZATION

SITE MOVEMENT

Movement organizes the site.

A defined vehicle entry, controlled internal circulation route, and dedicated exit establish a clear movement sequence across the forecourt.

- 01 VEHICLE ENTRY
- 02 INTERNAL CIRCULATION
- 03 VEHICLE EXIT

SITE PLAN - MOVEMENT DIAGRAM

NTS

PROJECT FOCUS

Site Planning · Architectural Design

Entry → Movement → Exit

PROGRAM LOGIC

Three layers. One coherent system.

Public, operational, and commercial functions occupy the ground level, while an independently accessed private residential level is organized above.

01 GROUND FLOOR

Retail, administration, public facilities, technical rooms, and vehicle-service functions are organized at ground level.

02 FIRST FLOOR

A private residential level is organized above the commercial and administrative building.

03 ROOF + CANOPY

Roof levels and canopy elements complete the project's vertical organization.

PRIVATE ACCESS

A dedicated rear entrance provides independent access to the private residential level, separated from public and service circulation to reinforce privacy.

PROGRAM PLANS - NOT TO SCALE

GROUND FLOOR — PUBLIC + COMMERCIAL + OPERATIONAL PROGRAM

FIRST FLOOR — PRIVATE RESIDENTIAL LEVEL

ROOF LEVELS + CANOPY

Main Building +7.50
Fueling Canopy +7.00
Service Building +6.35

PROGRAM LAYERS

Ground: public + commercial + operational

First: private residential

Vertical: clear separation

PROGRAM FOCUS

Public · Commercial · Operational · Residential

Ground

→ First

→ Roof

DESIGN LANGUAGE

A unified visual identity.

A restrained material palette, warm integrated lighting, and a unified visual identity connect the station's commercial, fueling, service, and residential components.

VISUAL LOGIC

01 CANOPY IDENTITY

Rounded fascia, bilingual signage, and integrated lighting establish the visual anchor.

02 FACADE RHYTHM

Vertical openings and recessed frames extend the language while preserving privacy.

03 MATERIAL CONTINUITY

Stone look warmth, dark contrast, and controlled accents reinforce one shared identity.

DESIGN INTENT

Material, lighting, facade rhythm, and wayfinding are presented as coordinated architectural intent — not construction specification.

COMMERCIAL FRONTAGE · NIGHT LIGHTING

CANOPY IDENTITY

RESIDENTIAL FACADE RHYTHM

MATERIAL LANGUAGE

Design-intent palette

Derived from approved renders — not a construction specification.

A calm, warm visual base for the project's shared architectural expression.

Warm contrast connecting entries, signage, and integrated lighting.

A darker layer adding facade depth, contrast, and commercial visibility.

A light edge defining canopy expression and the forecourt identity.

Surface contrast and guidance lines supporting movement legibility.

LIGHTING · IDENTITY

Rounded canopy fascia, bilingual identity, and integrated lighting establish a recognizable roadside presence while continuing the unified architectural language.

DESIGN LOGIC

Materials, lighting, facade rhythm, and bilingual signage create a coherent architectural identity and recognizable nighttime presence.

CENTRAL GONDOLA AISLE - RETAIL GRID

PROJECT OVERVIEW

A retail interior
shaped by flow
and visibility.

An implemented neighborhood supermarket interior organized around a clear retail grid, visible perimeter departments, and custom fixture systems. The design coordinates customer circulation, checkout orientation, ceiling and lighting design, and department identity within one coherent retail environment.

LOCATION	AREA
Makkah, Saudi Arabia	342 m ²
CLIENT	STATUS

Retail Planning · Interior Design · Fixture Design · 3D Visualization

RETAIL PLANNING

Four spatial anchors structure the retail plan.

Retail planning through clear spatial order.

READING THE PLAN

Four source based spatial anchors

- 01 ARRIVAL + CHECKOUT**
Front-of-store arrival zone with two documented checkout counters.
- 02 PERIMETER DEPARTMENTS**
Visible edge departments define the retail perimeter.
- 03 CENTRAL GONDOLA**
The documented fixture grid structures the central browsing field.
- 04 CHECKOUT + DEPARTURE**
The front checkout condition defines the departure side of the retail sequence.

FUNCTIONAL ZONES

- | | |
|-------------------------------------|-------------------------|
| 01 Entrance + Two Checkout Counters | 06 Bakery + Oven |
| 02 General Groceries | 07 Sweets + Baked Goods |
| 03 Cleaning Products | 08 Dairy + Cheese |
| 04 Refrigerated Beverages | 09 Fruits + Vegetables |
| 05 Meat Section | |

09 FUNCTIONAL ZONES

02 CHECKOUT COUNTERS

CEILING + LIGHTING

The ceiling system
extends the retail
grid.

Ceiling and lighting through a clear retail rhythm.

READING THE CEILING

Four source-based
ceiling + lighting conditions

C1 AISLE-ALIGNED LINEAR LIGHTING
Repeated linear elements align with the central aisle field.

C2 SPECIALTY CEILING ZONES
Distinct ceiling treatments appear in specialty areas.

C3 LOCAL + ACCENT LIGHTING
Localized points and accents support department differentiation.

C4 ENTRY + CHECKOUT LIGHTING
A distinct lighting condition marks the entry and checkout area.

FOUR CEILING + LIGHTING CONDITIONS

C1-C4 SOURCE-BASED CEILING + LIGHTING CONDITIONS

LINEAR AISLES - SPECIALTY ZONES - LOCAL + ACCENT - ENTRY + CHECKOUT

FIXTURE DESIGN

A four-variant fixture family structures the retail display system.

A documented family of custom retail fixtures supported by two source-based interior elevations.

DOCUMENTED DIMENSIONS

04

FIXTURE VARIANTS

Source drawing designations D1–D4 are retained; dimensions are shown only where documented in the supplied technical package.

2.30 m

DISPLAY HEIGHT

6.00 m · 7.00 m

DOCUMENTED LENGTHS

INTERIOR ELEVATIONS

ELEVATION A · BAKERY · SPECIALTY DISPLAY SYSTEM

ELEVATION B · ENTRY · CHECKOUT · PRODUCE WALL

Material callouts reproduced from source drawings for design-documentation context.

INTERIOR EXPERIENCE

One retail system,
expressed across key
departments.

Department-focused perspectives show the retail design language across bakery, front-of-store, and refrigerated service conditions.

BAKERY + SPECIALTY DISPLAY

ENTRANCE + CHECKOUT + PRODUCE

MEAT + REFRIGERATED DISPLAY

FRONT FAÇADE — NIGHT VIEW - FULL SOURCE COMPOSITION

PROJECT CONTEXT

Four façade design · residential identity · material + lighting intent

FAÇADE DESIGN · MATERIALITY · LIGHTING INTENT

AHMED BELAL ALI AL MARYAMI

PROJECT OVERVIEW

A composed façade with a measured neoclassical rhythm.

A modern neoclassical reading of a private residential villa, structured through layered profiles, framed vertical openings, and a coordinated boundary edge.

DESIGN RESPONSE

The front façade establishes a clear identity through balanced proportions, depth-bearing horizontal profiles, controlled material contrast, and warm exterior lighting placement.

PROJECT FACTS

LOCATION	YEAR
RIYADH, SAUDI ARABIA	2026
STATUS	SCOPE
IMPLEMENTED	04 FAÇADES DESIGNED
TYPE	ROLE
PRIVATE RESIDENTIAL VILLA	FAÇADE DESIGN + VISUALIZATION

DESIGN ROLE

Façade design + visualization

ARCHITECTURAL DESIGNER | INTERIOR DESIGNER

FAÇADE LANGUAGE

Depth, frame,
and evening light.

Across four designed façades, the language remains consistent: layered profiles establish depth, framed openings organize the elevations, and restrained contrast lets light articulate the edges.

MATERIAL + LIGHTING LANGUAGE

- 01 WARM OFF-WHITE SURFACES
- 02 LIGHT BEIGE STONE-TEXTURED ACCENTS

- 03 CHARCOAL METAL FRAMES + GATES
- 04 WARM EXTERIOR LIGHTING PLACEMENT

DESIGN INTENT

Material contrast and warm light reinforce façade depth and nighttime identity.

STATUS

IMPLEMENTED

PROJECT OPENER / DESIGN THESIS

A public landscape, shaped by the valley.

AERIAL PROJECT VISUALIZATION

Integrated public landscape · recreational program · terrain-responsive planning

Planning and Design of a Social, Sports and Entertainment Complex

DESIGN THESIS

OXIVA IBB uses the site's sloping agricultural terraces as an organizing framework for a connected public destination combining social, sports and entertainment programs.

PROJECT DATA

LOCATION
Wadi Al-Ma'ayin, Ibb, Yemen

YEAR
2024

SITE AREA
19.8 ha

PROJECT TYPE
Academic Graduation Project

PROJECT FORMAT
Academic Team Project

SITE CONTEXT / TERRAIN-RESPONSIVE CONCEPT

The valley becomes the organizing framework.

REAL SITE CONTEXT

Wadi Al-Ma'ayin landscape context - Ibb hillside terrain - urban-landscape edge

ENVIRONMENTAL • ACCESS ANALYSIS

MASTERPLAN / PROGRAM / MOVEMENT

One landscape, eight programmed zones.

SITE ORGANIZATION / TOP VIEW

Integrated destination zones organized through a connected hierarchy of roads, paths and shared public-space links.

PROGRAM ZONING

Eight source-verified activity zones

- | | |
|-------------------------|-----------------------------|
| 01 OUTDOOR SPORTS ZONE | 05 YOUTH ENTERTAINMENT ZONE |
| 02 INDOOR SPORTS ZONE | 06 ENTERTAINMENT OASIS |
| 03 SOCIAL ZONE | 07 HOTEL & HOSPITALITY |
| 04 CHILDREN'S PLAY ZONE | 08 RESTAURANT |

CIRCULATION HIERARCHY

Main roads, primary paths, secondary paths and suspended connections.

ARRIVAL + SHARED AMENITIES

Main and secondary arrivals connect the verified activity zones.

ADMINISTRATION - MOSQUE - RESTAURANTS & CAFES - RETAIL - PARKING

TERRAIN / VERTICAL ORGANIZATION

Architecture distributed, across changing ground.

SITE ELEVATION 01 - EAST

East elevation - 1:500 source drawing

SITE ELEVATION 02 - NORTH

North elevation - 1:500 source drawing

TERRAIN READING

The project distributes activity zones and landmark elements across the valley's changing levels, using terrain, circulation and landscape connections to create a continuous spatial sequence.

VERTICAL RELATIONSHIP

HIGH GROUND → TERRACED LEVELS → LOWER VALLEY

SITE OVERVIEW

Overall Site View

PROGRAMMED LANDSCAPES / SOCIAL LIFE

Landscapes for gathering,
leisure and shared life.

01 - SOCIAL ZONE

A connected landscape of gathering and shared public life.

SELECTED EXPERIENCES

02 - ENTERTAINMENT OASIS

Play, spectacle and shade within the public landscape.

03 - CHILDREN'S PLAY

A playful landscape for discovery and everyday activity.

PROGRAMMED LANDSCAPES / ACTIVE LIFE

Landscapes for movement, activity and youth recreation.

01 - OUTDOOR SPORTS

Open fields, courts and active movement across the site.

SELECTED EXPERIENCES

02 - INDOOR SPORTS

Enclosed activity spaces within the recreational sequence.

03 - YOUTH ENTERTAINMENT

A youth-oriented landscape of play and movement.

HOTEL / SELECTED ARCHITECTURAL DEVELOPMENT

A vertical landmark, shaped around the guest experience.

01 - HOTEL HERO

Principal exterior view - tower and public arrival

SELECTED ARCHITECTURAL EVIDENCE

02 - GUEST-ROOM PLAN

Guest-room floor plan - plan study

03 - FAÇADE DEVELOPMENT

Tower elevation - façade study

الواجهة الخارجية للمبنى 1000
